

Cellyx™ Wedge 50

Trademark and 2019 ©

Cellyx™ is our range of polyurethane acoustic foam. Acoustic foam is one of the most common used in acoustical treatment to reduce echoes and reverberations. The fire-rated foam density is engineered based on airflow resistive data. The wedge shape has increased surface area for absorption of mid-high frequencies. The wedge profile comes in 50mmL x 40mmH dimensions. The total thickness is 60mm respectively (inclusive of 10mm base).
